 **Istanbul Silah®**

Ethos

We, İstanbul Silah are a family-owned small arms factory operating both for private label manufacturing and international civilian markets. With over three decades of experience, we continue to make shotguns and rifles with 450 dedicated workers in our modern factory building based in the heart of Istanbul, Turkey.

To keep the quality of the products we make under control, each and every part of the firearms including plastic and wood, made 100% inhouse with state-of-the-art technology.

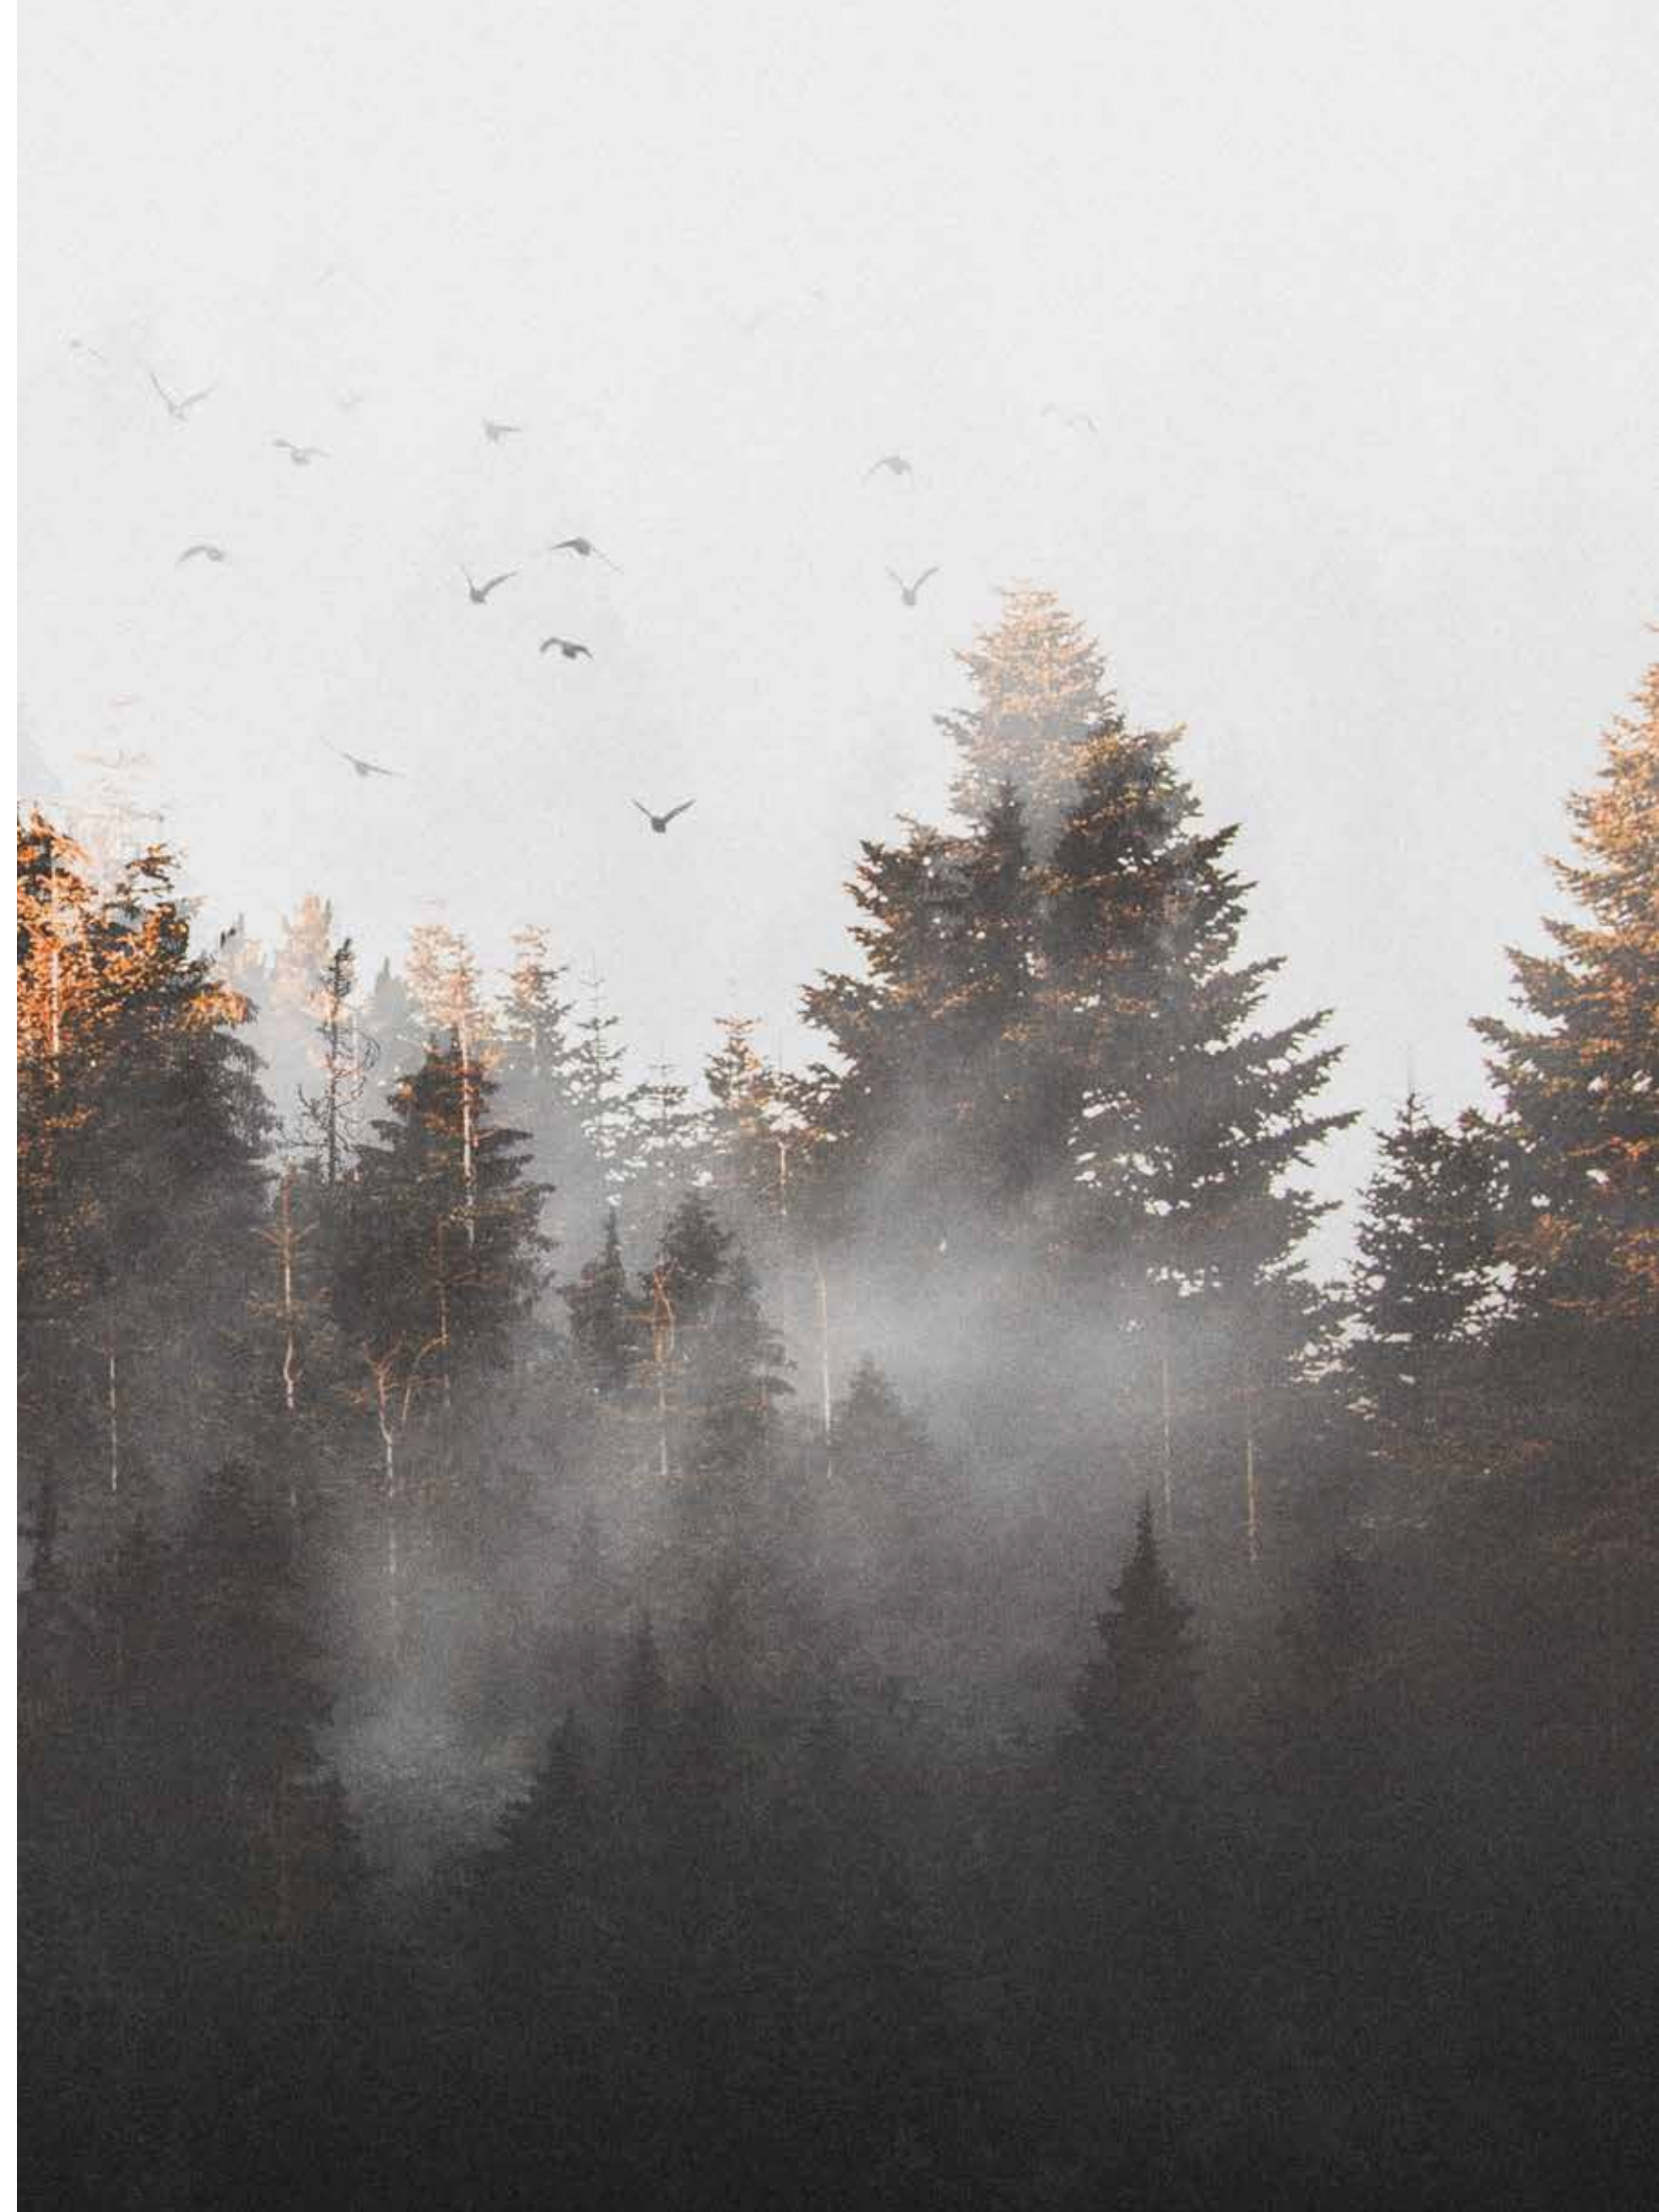

Long Term Usage

Ethics of turning nature – extracted raw materials to consumer products dictates several set of norms that needs to be taken seriously by companies like us in aspect of the things we owe to future generations, mother earth and the societies that we live in.

Here is what we learned structuring our principles and guidelines in all aspects of our business.

- A firearm that passed down in a family tree for couple of generations should still work when fired by grandchildren on a sunny day in the outdoors.
- Although things last when you look after them is mostly correct, there are limitations an end user can do when a CNC machined part needs a replacement. We design our products in a way that can be fixed one way or another, even decades later.

Features of Impala Plus

Hunting isn't a hobby for you; it's a passion. Besides to your heart and your soul. Is something you look forward to something you would enjoy every minute of. That's why when you hunt you need a shotgun that's going to deliver. A shotgun that you can rely on time and time again. A gun that could be passed down through the generations. Introducing the Impala Plus shotgun that has its unique design with patented technologies.

A gun that could be passed down through the generations. Introducing the Impala Plus line of shotguns. If shotguns manufactured in using a combination of time due to the CNC machining technology.

Details of Impala Plus

SIGHTS

Has a removable, snap on front sight attached on the bead. Slugs and Camo models comes with Tru-Glo fiber optic sights. Thanks to the original Tru-Glo rear sight and shallots, it provides high visibility even in low light conditions

TRUGLO
WHEN BRIGHTNESS COUNTS™

RECOIL PAD & STOCK

Special shock absorbing material combined with perfect coating offers snag-free, fast shouldering.

Removable cheek riser offers perfect fit in sport shooting, waterfowl hunts and using optics.(only synthetic models)

5 pcs of stock angle adjustment shims also included in the box for perfect fit.

TRIGGER

The ergonomic trigger group of Impala Plus is far beyond it's competitors in terms of mechanical structure. It provides high security in accordance with SAAMI standards.

BOLT

Unlike most shotguns, lock attaches directly to barrel itself with 6 lugs. This feature gives bigger and safer locking surface and easy opening of the lock with 15 °s turn.

Turn & remove cocking handle can be taken off the gun with 90 ° degree turn, this feature is an additional safety for storing the gun where there are kids around. Also, it's quite handy in disassembly when you need to remove the mechanism from receiver. Lightweight aircraft grade aluminum receiver made with state-of-the-art machinery of Istanbul Silah.

RECEIVER

Lightweight aircraft grade aluminum receiver made with state-of-the-art machinery of Istanbul Silah. Each receiver has two stainless steel rails mounted inside, this way hardened steel bolt does not contact the aluminum receiver and works with less friction thanks to surface quality of the rails. Also, it prevents abrasion in the receiver to make the gun stay new for decades.

FORE-END

Special "overmold injection" system used for placing anti-slip material on the stock and forend. Excellent handling on maneuver added to perfect balance of Impala Plus feels like shooting from an extension of the body.

BARREL

Drilled from 4140 steel, each and every barrel controlled for internal tiny cracks with magnetic resonance. Tested with 1.550 BAR. Internal bore diameter of the barrel is 18.7mm in high rib models. 18.50 mm in Slug barrels.

It's large barrel inner diameter reduces friction and kickback, while preventing pellet deformation, providing excellent grouping. Fully rifled paradox barrel is available for sabot slugs.

LIGHTWEIGHT

Comfortable carrying and shooting thanks to 3.2 kg (7 lbs.) overall weight.

We experience a stronger integration of our instincts alongside with best companions and the highest quality equipment in every breath we take in wilderness. Sounds and smells intensifies in hunter's perception as thrill speeds up the circulation.

Hunting, which has been the biggest part of life since the beginning of history, is a homage to the unique cycle of life.

This great culture, which progresses with the development of humanity and rises hand in hand with civilization, contains the naturalness of life and death as a basic principle.

With this principle, hunting, which constantly updates its ethical values, is being reshaped in an integrated manner with sustainability, which is the necessity of the age.

Civilization began as humanity learned to control fire. It can be used to cook, to warm, to sterilize or to destroy. Just like any other source of energy, it can flow, splash, explode. It can create or eliminate the things on its way.

Even before the invention of powder, Fire has been used as a source of energy for centuries. It is used in motors and vehicles, power stations, heating, or illumination.

With the invention of firearms, we got better in creating contained and controlled flow of firepower in milliseconds that can be directed to any target. We established or destroyed civilizations, provided food, protected what is important and kept them safe.

Just as cooks and arsonists used same source of energy for their own purpose, firearms can be used for varieties of purposes that doesn't involve violence, shooting as a sports or hobby will always be just fun. They can play the role of just a tool to satisfy one's desire for destruction in harmless, exciting and creative ways.

Hunting, which has been the biggest part of life since the beginning of history, is a homage to the unique cycle of life.

This great culture, which progresses with the development of humanity and rises hand in hand with civilization, contains the naturalness of life and death as a basic principle.

With this principle, hunting, which constantly updates its ethical values, is being reshaped in an integrated manner with sustainability, which is the necessity of the age.

Features of Monza

Monza has everything to offer whatever you expect from a modern rifle. Simple, lightweight, and reliable design gives the highest level of confidence in all kinds of circumstances.

User-friendly bolt moves in the receiver in such a perfect way to ensure best follow up shots. It can be disassembled in the field without any tools and ready to work in varieties of scenarios. It offers both easy follow up shots in closed areas and perfectly accurate in long range. It allows fast multiple shots with its perfect working mechanism and great balance.

Having many years of experience with rifles, Istanbul Silah includes all its design, R&D and 100% of production efforts under same roof. Produced with a new generation quality culture that blends skilled hands with highest technology.

Details of Monza

BOLT

Bolt mechanism of Monza can be disassembled without any tools. Simply by turning the firing pin cap allows you to remove and clean firing pin, firing spring and follower in the field when its required.

SCOPE MOUNT & RAIL

Mil STD 1913 22 mm picatinny rail is removable, receiver suitable for popular types of other mounts. Monza comes ready to install different types of mount bases when picatinny is removed.

2 inch (5 cm) picatinny bipod rail is compatible with most accessories.

STOCK & COMB RISER

Perfectly ergonomic synthetic stock reinforced with fiberglass combines lightweight and durability. Fixed or adjustable comb riser options provides perfect harmony between the rifle and the shooter.

TRUGLO
WHEN BRIGHTNESS COUNTS™

SIGHTS

Rear sight is adjustable and hidden in picatinny rail to prevent contact with scopes. The glowing dots in the rear sight is just perfect for fastest target acquisition. Original fiberoptic Tru-Glo front sight can be taken off from the barrel.

BARREL

Button rifled original Monza barrel made of high-performance steel with 4 grooves and 4 sets. Twist rates are 1/10 RH(20", 22") and 1/12(24") RH, finished with 11° crown. Anodized finishing for maximum scratch and corrosion protection. Muzzle thread available for all models.

MAGAZINE

Detachable, 4 capacity, double stack steel magazine sits perfectly in order to preserve sleek, slender silhouette of Monza.

SAFETY AND TRIGGER

Ergonomically perfect manual safety system locks the bolt and trigger in single movement.

The trigger pull weight of Monza is adjustable between 2,20 lbs.(1 kg) to 5,30 lbs.(2,4 kg).

Length of pull is adjustable + - 9,5 mm. Adjustable for creep and overtravel.

A person who is hunting may rest a loaded firearm or crossbow that is under their control on the vehicle to shoot only when the vehicle is not in motion and the engine is off.

It is unlawful for any person, while on a hunting trip, to negligently, carelessly, or willfully shoot and wound or kill any domestic animal or bird.

About

PRODUCT

Durability, long term usage

Easy Maintenance

Simple but innovative designs that last for generations.

Adaptive solutions for ever-changing circumstances

No fake promises

SOCIETY

Responsibilities to employees

Preserving the family culture in the company

Education and internship resources for future generations

Honest and open communication with communities.

THE EARTH

Re-cycling and waste management systems

Decent Environment Policy

Alternative and nature friendly energy solutions like solar power

Re-Purposing waste and by-products

We Are Sustainable

ENERGY

We provide our heating needs with clean energy.

We provide the heating need of the smart factory building with solar panels and use renewable energy sources.

ENVIRONMENTAL

We have a zero waste waste certificate.

Treatment plant

A zero waste application system has been established at the facility, with this practice, it is a goal defined as a waste management philosophy that includes preventing waste, using resources more efficiently, preventing or minimizing waste generation by reviewing the causes of waste generation, and collecting waste separately at its source and ensuring its recovery.

LIFECYCLE

We design and manufacture products that will consume the life cycle in the most efficient way.

Instead of designs suitable for fashion, we develop products suitable for use for many years.

RECOVERY

We invest in recyclable products. We are looking for ways to benefit from non-recyclable products.

Instead of destroying the products that do not pass the quality control and turning them into scrap, we permanently lose their firearm quality and give them life again, and we transfer the income of these accessories and products produced with the awareness of recycling to non-governmental organizations working to protect nature and wildlife.
